Saad Mohammed Noman

Front-End Web Developer

saad.kasani@gmail.com · +966 53 408 1798 · LinkedIn: Saad Mohammed

Riyadh, Saudi Arabia

PROFESSIONAL SUMMARY

Computer Science graduate (Diploma in Programming and Databases, King Saud University) with hands-on experience building and deploying full-stack web applications with JavaScript, SQL and Supabase. Built Data Guidance Navigator, a sales analytics and forecasting platform that won 1st Place for Best Diploma Project at AI Day. Seeking a front-end or full-stack web development role.

PROJECTS

Data Guidance Navigator (DGN) — Sales Analytics & Forecasting Platform — Graduation Project

Technologies: HTML5, CSS3, JavaScript (ES6+), Supabase, PostgreSQL, SheetJS, jsPDF, html2canvas, EmailJS, Git, GitHub, Netlify

- Designed, built and deployed a full-stack web application that turns uploaded Excel/CSV sales files into dashboards: total sales, orders, average order value, category and product performance, and low-stock alerts, for users with no data background.
- Developed a Linear Regression forecasting model (~92–93% R^2) to predict future monthly sales, and a what-if simulator that estimates the effect of price and demand changes, with break-even analysis and saved scenarios.
- Engineered a smart data-import engine (SheetJS) that detects and maps columns in files with Arabic or English headers, removes duplicate and invalid rows, and asks the user to confirm only when a match is uncertain.
- Implemented secure authentication with Supabase (PostgreSQL): email one-time-code verification (EmailJS), Google and GitHub sign-in, and passkey (Face ID / PIN) login; migrated the backend from Firebase to Supabase at the supervisor's request.
- Built a responsive bilingual interface (Arabic RTL and English) with light and dark modes, and PDF report export (jsPDF, html2canvas).
- Won 1st Place, Best Diploma Project, at AI Day.

EDUCATION

Diploma in Programming and Databases, King Saud University, College of Applied Studies — Riyadh, Saudi Arabia

Bachelor of Computer Science (Bridging Program), King Saud University — In progress

TECHNICAL SKILLS

Programming Languages	JavaScript (ES6+), Java, SQL
Web Development	HTML5, CSS3, Responsive Design, RTL / Bilingual Interfaces, Dashboard and Data Visualization UI
Backend & Databases	Supabase, PostgreSQL, Firebase, Authentication (OTP, OAuth, Passkeys)
Data & Libraries	Linear Regression (forecasting), SheetJS, jsPDF, html2canvas
Tools	Git, GitHub, Netlify
Concepts	Data Structures, Team Leadership

LANGUAGES

Arabic (Native) · English (Fluent)
